Friday 18th Aug	AM: Work on presentations (suggest Google Slides) & ReadMe 2.00pm: Presentations (Clients and full details TBC)

Suggested first steps

Asking for support

- **No DMs or group chats to trainers** - please post requests for help in #c11--classroom channel
- Be explicit about what you need help with in your message
 - “Pls could we get some Git help as we have tried to merge and we cannot resolve the conflicts” 
 - “Help in room 3” 
- When we get there, explain your issue including all the things you may have tried
- Books (internet), Brains, Buddies, Boss
- You are welcome to ask for help or raise any concerns (you can DM a concern of this sort)
- Let us know if someone in your group goes AWOL

Positive Group Work

- Communication, communication, communication
- Respect, respect, respect - everyone brings something to the table
- Don't go off and code a load of stuff by yourself - recognise anti-patterns
- Keep feedback constructive
- Be willing to consider feedback
- Keep your code tidy
- Commit regularly - we're expecting a minimum of 50 commits
- Try to enjoy it! Not easy to replicate this experience
